

FEP HEAT SHRINK TUBING FOR LAMPS

- ScanTube FEP Heat Shrink Tubing is used on Fluorescent lamps.
- The tubing provides excellent shatter protection.
- In case the lamp breaks, the FEP tube protects people and the environment from the dangerous glass fragments and poisonous substances, eg mercury.
- The FEP tubing is resistant to elevated heat and concentrated UV.
- FEP covered lamps are used in food processing, warehousing, retail and grocery, aircraft hangars, sport arenas, manufacturing plants, horticulture and aquariums where safety is important issue.
- The FEP Tubing is applied on lamps of size T5, T8 and T12.
